Aromatherapy in Iranian Cancer Patients: A Systematic Review

Fatemeh Maghsoud (1), Mohsen Adib Hajbaghery (2)

(1) Student Research Committee, Kashan University of Medical Sciences, Kashan, Iran.

(2) Trauma Nursing Research Center, Kashan University of Medical Sciences, Kashan, Iran.

Backgrounds

Methods

Findings

Conclusion

Aromatherapy, a simple, safe, and cost-effective complementary therapy, may help manage symptoms in cancer patients. Nurse education through in-service training programs may facilitate the integration of aromatherapy into clinical care and increase patients' families' awareness of its safe and and effective use at home.
